

SPOORTHI

Cybersecurity & Software Engineering Student

✉ Spoorthipyadav@gmail.com ☎ 7411822324 🌐 LinkedIn 🏠 Github

CAREER OBJECTIVE

Cybersecurity and Software Engineering student with hands-on experience across penetration testing, secure application development, and applied ML research. Proficient in Python, React.js, TypeScript, and MongoDB, with a track record of building end-to-end security tools from multi-agent vulnerability scanners to cryptographic file containers. Currently authoring research on GNN-based cascade failure detection and explainable phishing intelligence. Seeking to apply a builder's mindset to real-world security engineering challenges.

EDUCATION

Btech in Computer Science (Cybersecurity), NMAMIT | Nitte University
CGPA: 7.02

Pursuing – 2027

Pre University, Excellent PU COL Sunnari
Karnataka Board Percentage: 83.3%

2023

EXPERIENCE

Thaniya Technologies, Cybersecurity Intern

06/2025 – 07/2025

- Completed an intensive 10-day cybersecurity training covering Web Application Pentesting, Active Directory, OSINT, Digital Forensics, and hands-on use of 8+ industry-standard security tools.
- Executed end-to-end attack chains in a capstone CTF, identifying OWASP Top 10 vulnerabilities and documenting findings in a professional penetration testing report.

PROJECTS

QRIntel , *Explainable Threat Intelligence Platform for Malicious QR Infrastructure | Python, Optuna*

- Built a two-stage heuristic detection engine combining lexical, DNS, redirect, and SSL/visual analysis with Optuna-based optimization to catch quishing (QR phishing) attacks
- Generated deterministic, fully interpretable JSON audit logs for SOC analysts instead of black-box scores

CascadeShield , *Cyber-Physical Cascade Failure Prediction | Python, GNN, PyTorch*

06/2026 – July

- Built a hybrid graph neural network + epidemiological (SEIR) model to predict cascading attacks across interdependent smart-city infrastructure networks, trained on synthetic multi-infrastructure dependency graphs
- Achieved ROC-AUC of 0.7063 and Precision@K of 0.4242, outperforming a bootstrap-validated Blind SEIR baseline

Cyber DNA , *Continuous Behavioral Authentication for Insider-Threat Detection | JavaScript*

- Built a behavioral authentication framework generating per-user "digital DNA" profiles from login and activity patterns to flag anomalous insider behavior before damage occurs
- Evaluated on the CMU CERT insider-threat benchmark dataset

CERTIFICATIONS

AINNOVATION 2025, Microsoft Azure Learning Challenge

Gained practical knowledge in Cloud Computing (Azure) and Artificial Intelligence (AI) through Microsoft's learning initiatives.

NPTEL (IIT Madras), Systems and Usable Security & Internet Crimes and Cyber Security

Gained a strong foundation in system security, usable security, cybercrime, digital forensics, cyber laws, threat analysis, and core cybersecurity principles.

SKILLS

Programming & Development:

Python, JavaScript (ES6+), TypeScript, React.js, Node.js, Express.js, FastAPI, MongoDB

Cybersecurity Skills

OWASP Top 10, VAPT, SQL Injection, XSS, Active Directory Pentesting, OSINT, Digital Forensics, Role-Based Access Control (RBAC), CTF Problem Solving

Software Testing:

Manual Testing, API Testing, Test Case Writing, Bug Reporting

Tools & Technologies

Burp Suite, Metasploit, Shodan, Docker, Kali Linux, Git/GitHub

EXTRACURRICULAR ACTIVITIES

PROTON, NMAMIT, CULTURAL HEAD

2024 – 2026

Serving as the Cultural Head of PROTON, the Cybersecurity Department student association, leading cultural initiatives and coordinating departmental events.

KALASANGAMA, NMAMIT, MEMBER

2024 – 2025

Contributed to event coordination while actively participating in, organizing, and winning multiple cultural competitions and events.

CYBERSECURITY AWARENESS VOLUNTEER

Conducted cybersecurity awareness sessions for students across schools and colleges through PROTON NMAMIT in collaboration with Rotary Club Nitte.

ACHIEVEMENTS

CYBERSIEGE 2026, Alva's IET

Secured 3rd Place in a 24-hour Capture The Flag (CTF) cybersecurity competition conducted by Alva's Institute of Engineering & Technology.

HACKFEST '26, NMAMIT

Participated in a cybersecurity-focused Capture The Flag (CTF) competition involving security challenges, problem-solving, and team collaboration.

NITTE MANAGE AGRIBUSINESS CONCLAVE 2024, NMAMIT

Secured 2nd Runner-Up in the Folk Dance Competition, demonstrating teamwork, coordination, and cultural excellence.
