SPOORTHI *Cybersecurity & Software Engineering Student*

Spoorthipyadav@gmail.com 7411822324 Linkedln Github Portfolio

CAREER OBJECTIVE

Cybersecurity student with knowledge of Python, operating systems, networking, and cybersecurity tools. Hands-on experience in technical investigation and problem-solving, with an interest in troubleshooting issues and learning new technologies. Seeking to apply my skills in IT infrastructure, cloud support, and security operations.

EDUCATION

Btech in Computer Science (Cybersecurity), *NMAMIT* Pursuing – 2027
CGPA: 7.02

Pre University, *Excellent PU College, Sunnari* 2021 – 2023
Karnataka Board Percentage: 83.3%

SKILLS

Programming & Development:
Python, JavaScript, SQL

Troubleshooting & Security:
Linux, Windows Fundamentals, TCP/IP, DNS, HTTP/HTTPS, Active Directory Fundamentals, Log Analysis, Network Security, OWASP Top 10, Vulnerability Assessment

Tools & Technologies:
Git/GitHub, Docker, Wireshark, Burp Suite, Kali Linux, Postman, SQLite, Neo4j

EXPERIENCE

MAHE-ISAC Centre of Excellence for Cybersecurity, *Cybersecurity Intern* 06/2026 – 07/2026
- Contributed to cybersecurity projects involving cyber-physical infrastructure risk analysis and behavioral authentication for insider-threat detection.
- Used Python and technical tools to analyze system behavior, evaluate results, and support technical investigation and problem-solving.

Thaniya Technologies, *Cybersecurity Intern* 05/2025 – 07/2025
- Gained hands-on experience in web application security testing, Active Directory fundamentals, OSINT, and digital forensics using 8+ security tools.
- Investigated OWASP Top 10 vulnerabilities during a capstone CTF and documented findings in a structured penetration testing report.

PROJECTS

QRIntel , *Explainable Threat Intelligence Platform*
- Developed a threat detection platform to identify malicious QR-linked URLs through lexical, DNS, redirect, SSL, and visual analysis.
- Implemented explainable threat analysis and structured JSON audit logs to support security investigations and traceable results.
- **Research Paper:** Accepted at the International Conference on Secure IoT and Cybersecurity (ICOSICS 2026).
- **Tools:** Python, Flask, React.js, OpenCV, Selenium, NetworkX, SQLite, Optuna

Cyber DNA , *Behavioral Authentication*
- Developed a behavioral authentication framework to analyze user activity and identify anomalous logins and suspicious behavioral patterns.
- Applied Python-based data analysis and machine learning techniques to support continuous authentication and insider-threat detection.
- **Tools:** Python, Pandas, NumPy, XGBoost, React.js, Vite

CascadeShield , *Cyber-Physical Cascade Failure Prediction*
- Developed a hybrid Graph Neural Network (GNN) and SEIR model to analyze cascading attacks across interconnected infrastructure networks.
- Built a FastAPI backend and React dashboard to represent infrastructure dependencies and visualize cascading risks.
- **Tools:** Python, PyTorch, PyTorch Geometric, FastAPI, React.js, NetworkX, Neo4j

ACHIEVEMENTS

CYBERSIEGE 2026, Alva's IET
Secured 3rd place in a 24-hour Capture The Flag (CTF) cybersecurity competition, demonstrating technical investigation and problem-solving skills.

CERTIFICATIONS

NPTEL (IIT Madras), *Systems and Usable Security & Internet Crimes and Cyber Security*
Gained a strong foundation in system security, digital forensics, cybercrime, threat analysis, and cybersecurity principles.
AINNOVATION 2025, *Microsoft Azure Learning Challenge*
Gained practical knowledge in Azure Cloud Computing and Artificial Intelligence through Microsoft's learning initiatives.

EXTRACURRICULAR ACTIVITIES

PROTON, NMAMIT, *CULTURAL HEAD, 2024 – 2026*
Coordinated departmental events and cultural initiatives, supporting team collaboration and event execution.

CYBERSECURITY AWARENESS VOLUNTEER
Gained a strong foundation in system security, digital forensics, cybercrime, threat analysis, and cybersecurity principles.
